EDUCATION

LDRP Institute of Technology and Research

Bachelor of Engineering in Computer Science · CGPA: 7.79(till 6th Sem)

Gandhinagar,GJ

2024-2027

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, GSAP, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSocket, Socket.IO, JWT, OAuth 2.0, Nodemailer

Databases: MongoDB, MySQL, PostgreSQL, Redis

DevOps: Git, GitHub, Docker, Vercel, Render

AI / ML: RAG Pipelines, LangChain, Agentic AI, FAISS, Vector Search

EXPERIENCE

Freelance Frontend Developer

Feb. 2026-Present

Om Money Zone - Insurance, Mutual Funds & Loans

- Built responsive, animated UIs using Next.js, and Tailwind CSS,implemented motion.dev animations to enhance user engagement.
- Designed scalable component architecture with category-based dynamic rendering across multiple insurance product workflows.
- Optimized performance via lazy loading and SEO-focused structure; collaborated directly with client to deliver production-ready features.

Freelance Web Developer [Link](#)

Dec. 2024-Feb2025

Eternal Overseas - Manufacturer & Marchent Exporter of all Construction / Building Materials

- Shipped a production React.js website now receiving 1,200+ active visitors/week; delivered end-to-end in 6 weeks.
- Built full product catalogs, service pages, and a conversion-focused layout with complete client communication and UI design ownership.

PROJECTS

Verdict AI | Python, FAISS, RAG, Sentence Transformers, Groq API, Redis, LangChain

- Built a scalable multilingual legal RAG system to retrieve and analyze 100K+ Indian court judgment chunks via natural language queries across regional languages.
- Engineered hybrid search combining FAISS semantic vector search, keyword retrieval, and contextual reranking for relevance on citation-heavy judgments.
- Implemented Redis caching to reduce repeated embedding computations integrated Groq API for fast multilingual inference across legal queries.
- Built year-wise FAISS indexing pipelines with JSONL preprocessing, metadata extraction, and BGE/MiniLM embeddings for low-latency retrieval at scale.

DevSwipee | MERN, Socket.IO, JWT, GitHub OAuth, Nodemailer, Gemini API, Docker

[Link](#)

- Developed a full-cycle MERN developer collaboration platform Tinder-style project discovery with Jira-inspired Kanban session workspaces.
- Implemented GitHub OAuth 2.0, JWT dual-token auth (access + refresh in HttpOnly cookies), forgot password flow, and email verification via Nodemailer.
- Built real-time match engine with Socket.IO isolated rooms for chat, notifications, and live Kanban boards; Gemini API for project scoring.
- Containerized full stack with Docker Compose production-ready monorepo with separated backend/frontend workspaces, deployed to Vercel.
